

## Integrating Updated Com Port and Classic Com Port

Before continuing with this integration guide:

- Identify the difference between *NextLight Updated Com Port* and *NextLight Classic Com Port* by locating the "RJ12 Updated" sticker on the *NextLight Updated Com Port*.
- *NextLight Classic Com Port* will have no identifying sticker.

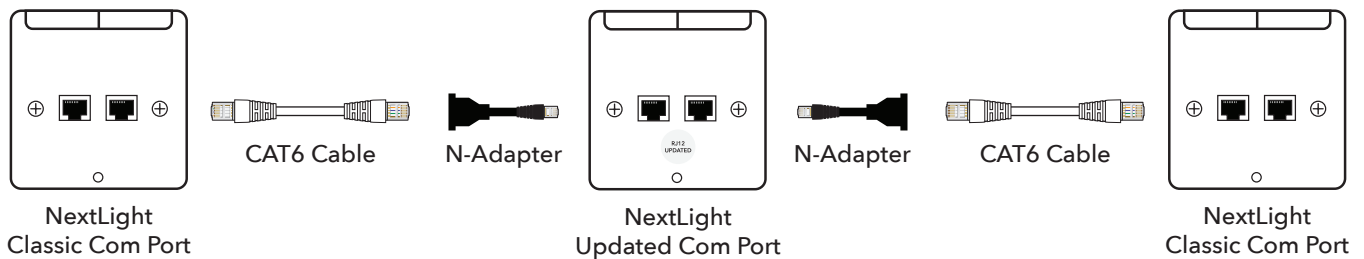

**N-Adapter** is needed when integrating *Updated Com Port* with *Classic Com Port*. The **N-Adapter** has CAT6 female connection and RJ12 male connection.

N-Adapter

\* Use 2x N-Adapters per Updated Com Port to convert RJ12 connection to CAT6.

## Dimming Communication Signal Flow

\*RJ12 sockets on *NextLight Updated Com Port* and CAT6 sockets on *NextLight Classic Com Port* can act as input or output.

Contact **NextLight** via email at [sales@nextlight.com](mailto:sales@nextlight.com) or call 513.718.7556 for additional operational guidance.
